### DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/12/2004 has been entered.

#### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,3,5,6,8,10,12,14,15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Drug Launches (1993) and view of the acknowledged prior art and Schmidt et al. (US Pat. 5,424,064), Holtman et al. and Sable et al. for the reasons of record and the further reasons below.

Drug Launches (1993), the acknowledged prior art, Schmidt et al. (US Pat. 5,424,064), Holtman et al. and Sable et al. were discussed in the prior Office Actions and the same are incorporated herein.

Examiner has duly considered Applicant's arguments but deems them unpersuasive.

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*,

231 USPQ 375 (Fed. Cir. 1986). Further, the test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary reference; nor is it that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art. See *In re Keller*, 208 USPQ 871 (CCPA 1981).

Although the authors in the Holtmann et al. concluded that the “precise mechanism of action remains to be elucidated”, this does not take away from the fact that simethicone is effective in treating gastric disturbances in humans which are not gas related, suggesting that increased gastric motility is an effect of simethicone. The fact that Applicant was unable to observe increased gastric motility in rats does not overcome this suggestion. Obviousness does not require absolute predictability, only a reasonable expectation of success, i.e., a reasonable expectation of obtaining similar properties. See, e.g., *In re O ’Farrell*, 7 USPQ2d 1673, 1681 (Fed. Cir. 1988).

Applicant argues that Examiner has used hindsight reasoning. However, the prior art discloses that bisacodyl and simethicone are both used to treat similar or the same gastric disturbances (Drug Launches (1993), Abstract; Acknowledged prior art, Specification, pg. 1, lines 27-31; Schmidt et al. (Column 8, lines 53-61); Holtmann et al. , Abstract; Sabel et al., Abstract). “It is prima facie obvious to combine two compositions each of which is taught by the prior art to be useful for the same purpose, in order to form a third composition to be used for the very same purpose.... [T]he idea of combining them flows logically from their having been individually taught in the prior art.” *In re Kerkhoven*, 205 USPQ 1069, 1072 (CCPA 1980) (citations omitted) (Claims to a process of preparing a spray-dried detergent by mixing together

Art Unit: 1616

two conventional spray-dried detergents were held to be *prima facie* obvious.). See also *In re Crockett*, 126 USPQ 186 (CCPA 1960) (Claims directed to a method and material for treating cast iron using a mixture comprising calcium carbide and magnesium oxide were held unpatentable over prior art disclosures that the aforementioned components individually promote the formation of a nodular structure in cast iron.); and *Ex parte Quadranti*, 25 USPQ2d 1071 (Bd. Pat. App. & Inter. 1992) (mixture of two known herbicides held *prima facie* obvious).

Therefore, the claimed invention, as a whole, would have been *prima facie* obvious to one of ordinary skill in the art at the time the invention was made, because every element of the invention has been collectively taught by the combined teachings of the references.
